```

# Problem 1

Write a function `multEq :: Int -> Int -> [Int]` that, given two nonzero positive numbers `x` and `y`, outputs the infinitely-increasingly-ordered list containing the numbers formed by multiplying the same amount of `x` and `y`.

Input

```
take 6 $ multEq 2 3
```

```
take 5 $ multEq 3 7
```

Output

```
-> [1,6,36,216,1296,7776]
```

```
-> [1,21,441,9261,194481]
```

# iterate

**Input: take 10 (iterate (2\*) 1)**

**Output: [1,2,4,8,16,32,64,128,256,512]**
