```

Necessary Tools

Glasgow Haskell Compiler (GHC):

- compiler (ghc)
- interpreter (ghci)

Code Editor

Terminal

Installation on Ubuntu

Install `ghc` with `apt`.

```
sudo apt install ghc
```

Installation on Mac

Use [Homebrew](#)

```
brew install ghc
```

Installation on Windows

Use Chocolatey

```
chocolatey install ghc
```

Summary

- To work in Haskell you only need to install GHC.
- It is easy!
- GHC offers a compiler and an interpreter.
- You will also need your favorite editor and a terminal.
